

# Assignment: Assignment Name Goes Here

Name/ID: 유채은 / 22200476

Date: 25/Sep/12

## Instruction

### What you need to submit

Submit as a zip file: [Assignment\\_Debugging\\_YuChaeun\\_22200476.zip](#)

- **Report** (pdf)
- **Src Codes:** (1) [Assignment\\_Debugging\\_YuChaeun\\_22200476.cpp](#)  
(2) [NP\\_Debugging\\_header.h](#), [NP\\_Debugging\\_header.cpp](#)

## Honor Code

I have NOT used Chat-GPT (or similar LLMs), other online materials, or other students' reports/codes to complete this assignment.

Sign: \_\_\_\_YuChaeun\_\_\_\_

If you have not done this assignment all by yourself, you must explain in detail how you received help. (Chat-GPT prompt, details of how you received peer assistance, etc.)

---

---

# Problem

## Preparation

1. Download the assignment file and unzip.

\* Download file here: Assignment\_Debugging.cpp

2. Copy Library Header File to **include** directory: `.\NP\include\`

\* `NP\_debugging\_header.cpp`, `NP\_debugging\_header.h`

\* The same files used in Tutorial.

3. Create a new project under **assignment** directory: `.\NP\assignment\`

\* Project name: `Assignment\_Debugging`

4. Copy the source file under **project** directory: `.\NP\Assignment\Assignment\_Debugging\`

\* File: `Assignment\_Debugging.cpp`

5. Add the source file in Visual Studio Project

## Procedure

Run the code and read the error message first!!

List all the errors and fix them.

|     | Code  | Description ▼                                                                           |
|-----|-------|-----------------------------------------------------------------------------------------|
| abc | E0020 | identifier "sum_int" is undefined                                                       |
| abc | E0020 | identifier "subtract_int" is undefined                                                  |
| abc | E0020 | identifier "gers" is undefined                                                          |
| abc | E0065 | expected a `;                                                                           |
| abc | E0065 | expected a `;                                                                           |
| !   | E1696 | cannot open source file "../include/NP_debugging_header.h"                              |
| ✖   | C1083 | Cannot open include file: '../include/NP_debugging_header.h': No such file or directory |

```

✖ C2146 syntax error: missing ';' before identifier 'd'
abc E0020 identifier "subtract_int" is undefined
abc E0065 expected a ';'
abc E0065 expected a ';'
✖ C1075 '{': no matching token found
✖ C2601 'sum_int': local function definitions are illegal
⚠ C4477 'printf' : format string '%f' requires an argument of type 'double'; but variadic argument 2 has type 'int'
✖ C2065 'd': undeclared identifier

```

Error : *E0020*

#### Error Message:

*Identifier "Sum\_int" is undefined  
Identifier "gers" is undefined*

#### Error Reason:

*The function "sum\_int" is correctly defined, but part of a comment above, "gers," escaped the comment line, so the program could not recognize it.*

*Also, the function is not declared.*

#### Solution:

```

// Sum of two integers
int sum_int(int a, int b) {
    int sum = a + b;
    return sum;
}

```

---

Error : *E0020, E1696, C1083*

#### Error Message:

*Identifier "subtract\_int" is undefined*

*Cannot open source file "../include/NP\_debugging\_header.h"*

*Cannot open include file: '../include/NP\_debugging\_header.h': No such file or directory*

### Error Reason:

*The function, "subtract\_int," is correctly defined in "NP\_debugging\_header.cpp" and declared in "NP\_debugging\_header.h." However, the directory was wrong, so the program could not find the header files.*

### Solution:

```
#include <stdio.h>
#include "../include/NP_debugging_header.h"

////////////////////////////////////
// Function Declaration
////////////////////////////////////
```

Error : C2146, E0065

### Error Message:

Syntax error: missing ';' before identifier 'd'  
Expected a ';'

### Error Reason:

A variable 'd' is missing its data type.  
*"int c = 3" is missing a semicolon.*

### Solution:

```
int main() {
    int a = 1;
    int b = 2;
    int c = 3;
    int d = 4;
```

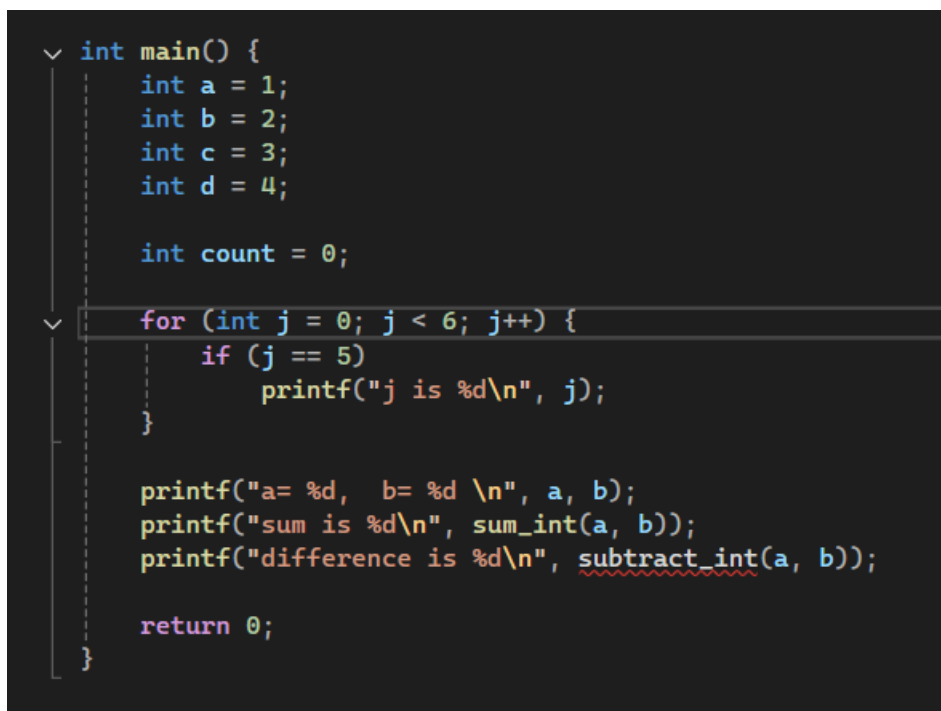

## Error : C1075

**Error Message:**

{': no matching token found

**Error Reason:**

*There is no bracket to close the main function.*

**Solution:**

```
int main() {  
    int a = 1;  
    int b = 2;  
    int c = 3;  
    int d = 4;  
  
    int count = 0;  
  
    for (int j = 0; j < 6; j++) {  
        if (j == 5)  
            printf("j is %d\n", j);  
    }  
  
    printf("a= %d, b= %d \n", a, b);  
    printf("sum is %d\n", sum_int(a, b));  
    printf("difference is %d\n", subtract_int(a, b));  
  
    return 0;  
}
```

## Error : C6272

**Error Message:**

Non-float passed as argument '3' when float is required in call to 'printf' Actual type: 'int'.

**Error Reason:**

*The variable 'b' is defined as the data type, int, but a float typed argument is called; ; '%d' is needed rather than '%f'.*

**Solution:**

```
}  
  
printf("a= %d, b= %d \n", a, b);  
printf("sum is %d\n", sum_int(a, b));  
printf("difference is %d\n", subtract
```
